Rotte **PACKline**

Packing industrial goods is a complex and highly demanding task. It is not uncommon for the goods to be exposed to extreme influences and to remain in the same packaging for a long time.

We offer you a **high-performance packing solution** that optimally protects your large and heavy goods during transport.

Experience the
Rotte **PACKline**
in action!

PACKING EXAMPLE

PARTS PORTFOLIO

Component	Alucobond plates
Material (component)	Aluminium
Component weight	min. 500 kg / max. 2.000 kg
Component height	min. 50 mm / max. 600 mm
Component length	min. 1.650 mm / max. 8.500 mm
Component width	min. 850 mm / max. 2.100 mm

TRANSPORTATION MEDIUM

Type	pallets
Dimensions	min. 850 mm / max. 2.150 mm
Weight	min. 30 kg / max. 500 kg
Transport height	ca. 900 mm

Optimise your material flow and warehouse logistics

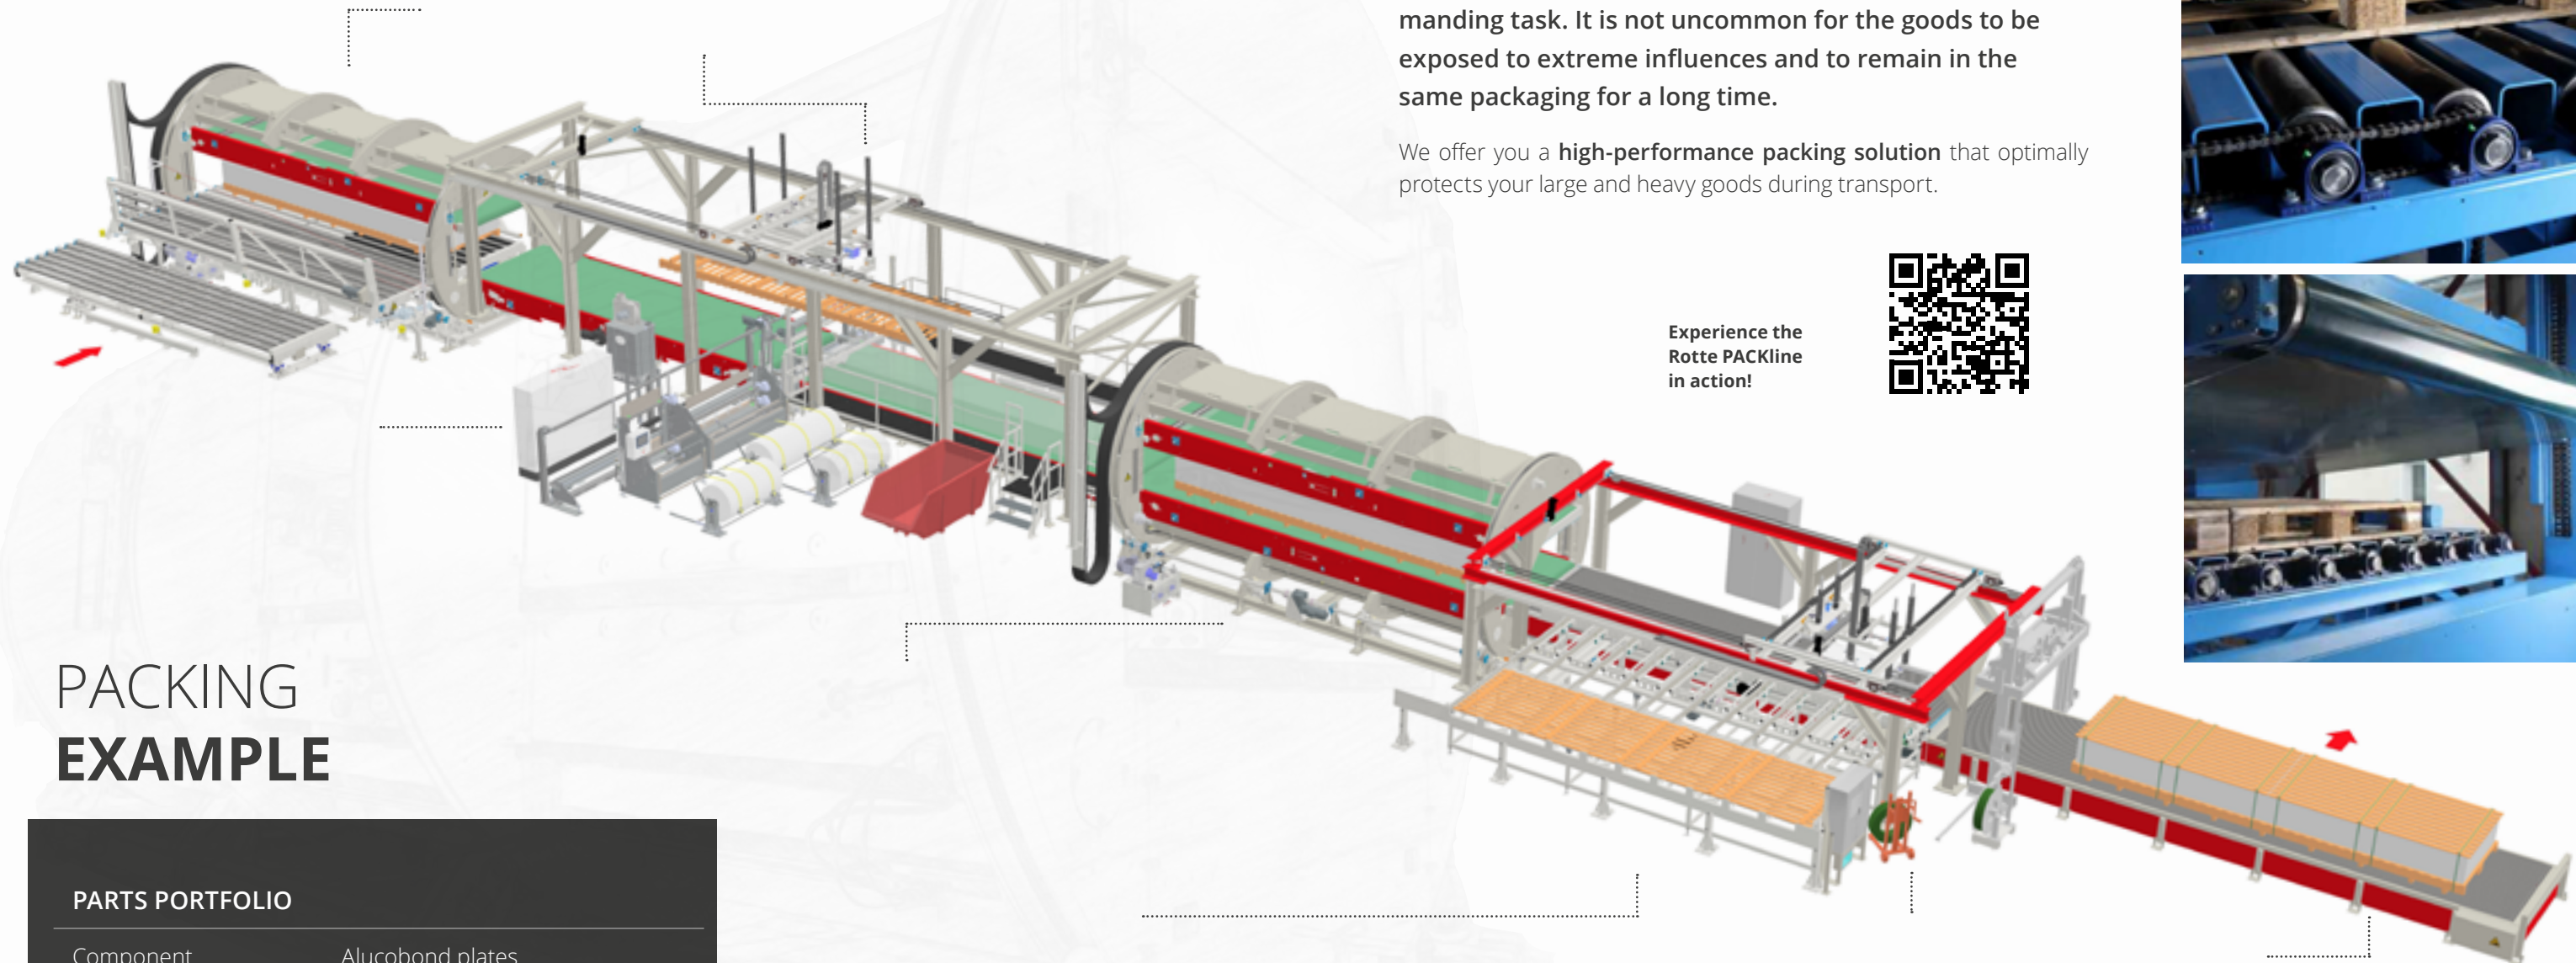

Protect your products from acids, dust and damage before their shipment.

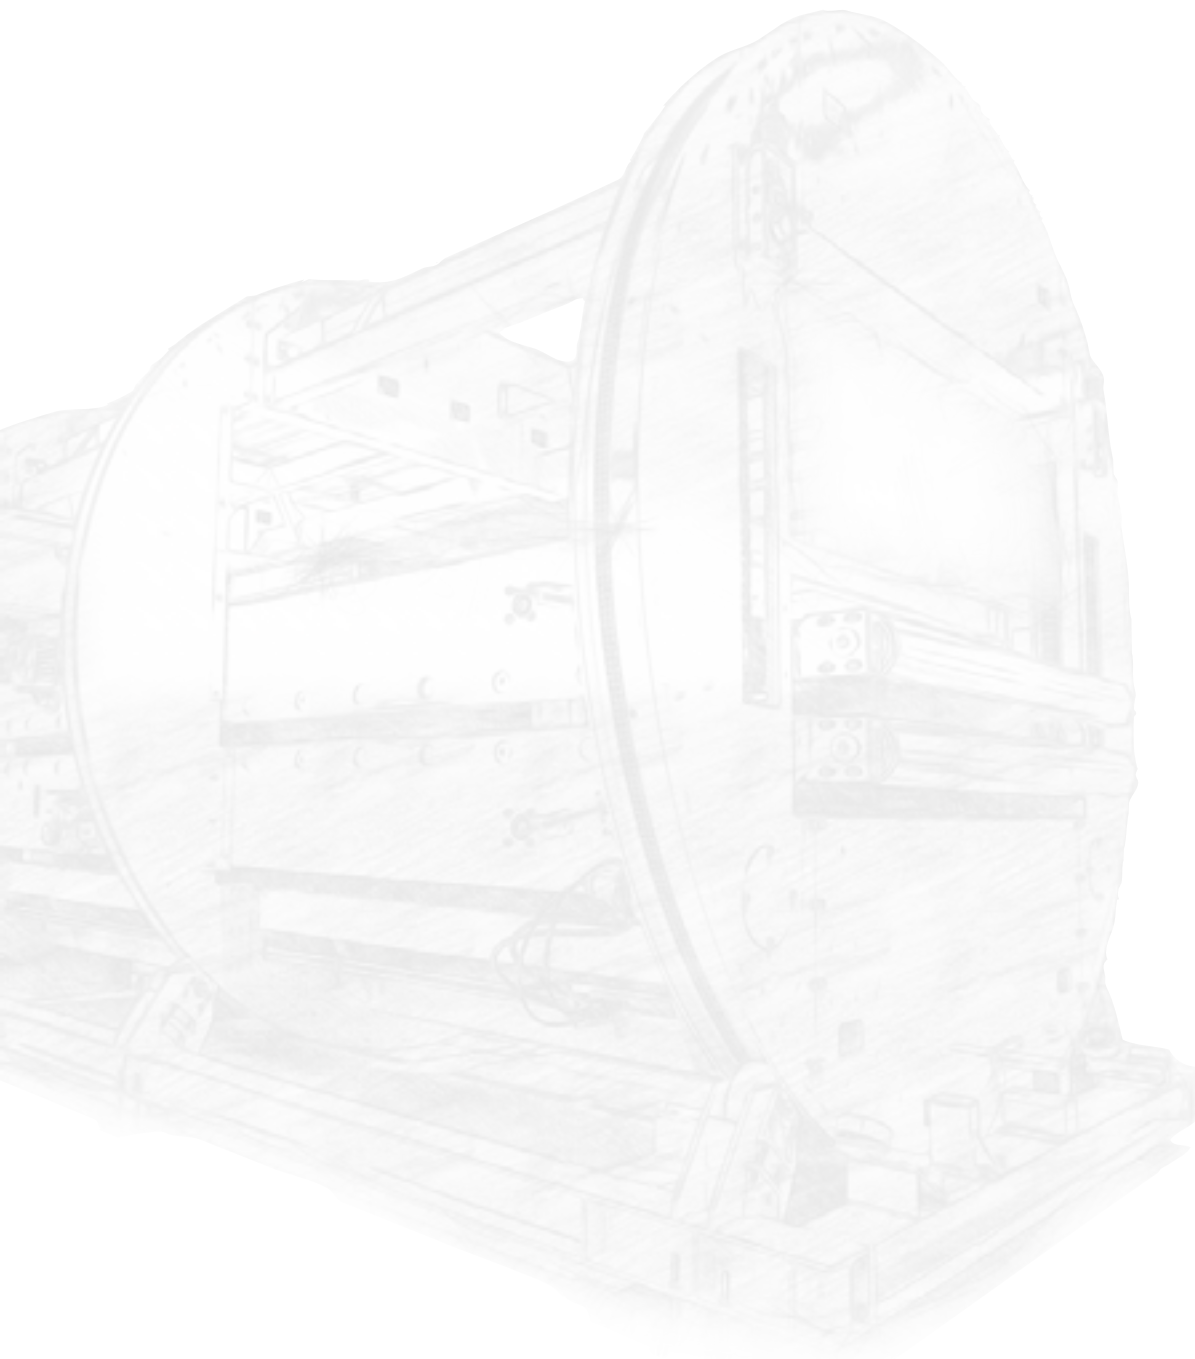

The Rotte **PACKline** separates the goods from the load carrier and automatically wraps them in a protective stretch film. The goods are then returned to the pallet and covered with a lid. This ensures that your goods are safely packaged.

Designed for more sustainability and efficiency in your packaging handling.

HIGHLIGHTS

- ➔ C-frame drum turners for transverse infeed ensure the central infeed of the pallets.
- ➔ Controllable pressure distribution ensures material-friendly handling.
- ➔ The unique design allows the drum turner to be completely dismantled. Deep sea shipping possible!
- ➔ Low-noise turning.
- ➔ Less consumables and higher packaging capacity.
